

KLIMENT SIDOROV

Full Stack Engineer | React, Next.js, TypeScript.

ABOUT ME

Full Stack Engineer with 4+ years of experience building scalable web applications, CMS platforms, booking systems, and tournament management software using Next.js, React, TypeScript, Node.js, GraphQL, and modern databases. Experienced in delivering production applications for casino and sportsbook platforms, custom CMS solutions, and business systems. Passionate about building maintainable software with strong performance, clean architecture, and excellent user experience.

EXPERIENCE

Front-end Developer – CatoriTech

Apr 2024 – Jun 2026

- Owned frontend development and technical decisions for casino and sportsbook platforms using Next.js, React and TypeScript.
- Built login flows and token-based session management.
- Integrated Altenar and Novusbet sportsbook services, plus casino games from Evolution and Pragmatic Play.
- Implemented APCOPAY payment integration and Smartico functionality for deposits, withdrawals and bonuses.
- Built a reusable, component-based CMS that enabled nontechnical teams to manage website content.
- Independently delivered frontend features from requirements through implementation, using Tailwind CSS and Sass.
- Built an affiliate program for the casino platform.
- Implemented ticket redemption functionality, allowing users to enter a purchased ticket's ID and credit its value to their account balance.

Full Stack Engineer Sols

Mar 2023 – Mar 2024

- Owned backend and frontend development from initial implementation to completion for the EUSPA User Space Container platform and the Resilient Caribbean Communities project website.
- Built user profiles, project sharing and project discovery features for the EUSPA platform.
- Developed Strapi content models and APIs and integrated them with Next.js frontends, delivering complete features end to end.
- Built responsive interfaces using Tailwind CSS and Sass, with GraphQL and SWR for data integration and fetching.

Front-end Developer Steets

Mar 2022 –Mar 2023

- Built reusable UI components and responsive interfaces, initially using jQuery and later Next.js.
- Developed frontend components using TypeScript, Tailwind CSS and Storybook.
- Integrated frontend interfaces with a PHP-based CMS to display and manage dynamic content.

Mentor Seavus / Qinshift / Avenga

Nov 2022 - Present

- Taught HTML, CSS and JavaScript to aspiring developers.
- Mentored students through real-world frontend projects and best practices.
